## Education

**Bucharest University of Economic Studies**  
Faculty of Economic Cybernetics, Statistics and Informatics  
Master's degree in IT&C Security  
2022 - 2024

**Bucharest University of Economic Studies**  
Faculty of Economic Cybernetics, Statistics and Informatics  
Bachelor's degree in Economic Informatics  
2019 - 2022

## Skills

- JavaScript - React, GraphQL, FintechOS
- C# - Entity Framework
- SQL - SQL Server
- Automated testing - Playwright, Git, Agile

## Language

- Romanian - Native
- English - C1
- French - B2

## Certifications

- FintechOS Platform 24.1 for Developers
- Oracle Academy - Database Design and Programming with SQL
- Oracle Academy - Database Programming with PL/SQL
- Certificate in Advanced English C1

# Cristian-Mihail Dumitrescu

Software Developer  
Bucharest, Romania

I'm a Full-Stack Software Engineer with 4+ years of experience building and maintaining software solutions across banking, insurance, and financial services. My experience spans both front-end and back-end development, with a focus on JavaScript, React, C#, Entity Framework, SQL Server, FintechOS, and GraphQL. I've worked on large legacy codebases as well as newer financial technology platforms, contributing to feature development, application modernization, integrations, automated testing and documentation.

## Work Experience

- Jul 2025 - present - 1 year, 2 months  
**Deloitte - Senior Consultant**
  - Create and maintain 10+ reports used across 1,000+ CEC bank branches, ensuring accurate reporting for critical banking operations.
  - Develop and integrate features for a credit card platform used by a major Romanian bank, including digital signature, OCR, and reporting workflows, using JavaScript, FintechOS, and SQL.
  - Develop and maintain a dedicated testing application covering credit card, personal loan, and overdraft workflows, using React and Playwright to automate and validate complex business flows.
  - Analyse business and technical requirements during Agile sprint analysis sessions and ticket refinement, contributing to technical decisions and selecting appropriate implementation approaches together with the development team.
  - Develop high level documentation for client and stakeholders.
- Dec 2024 - Jul 2025 - 8 months  
**Bitnovel Solutions - Software Developer**
  - Implemented solutions for banking requirements for BRD using FintechOS and SQL, contributing to the development and maintenance of financial workflows.
  - Analysed business requirements and translated them into application changes within the FintechOS platform.
  - Developed and optimized SQL reports for bank branch operations, reducing report generation time and improving data freshness by leveraging updated data sources.
- Sep 2022 - Dec 2024 - 2 years, 4 months  
**Totalsoft - Junior Software Developer**
  - Implemented new features for 3+ enterprise clients (BCR, Mercedes-Benz, BMW) on legacy versions of the application, ensuring compatibility and stability across established codebases, using C#, React, GraphQL, Entity Framework, and SQL across both frontend and backend components.
  - Worked with a microservices-based architecture, contributing to modernization of separate services responsible for customer management, leasing operations, and application administration as well as improved open source packages.
  - Performed debugging and root-cause analysis across both frontend and backend code using Visual Studio and Visual Studio Code, as well as troubleshooting SQL scripts and database operations by analysing captured queries and parameters with SQL Server profiling tools.
  - Developed documentation and installation steps for easier onboarding.
