

Cristian-Mihail Dumitrescu

Software Developer

Passionate senior software developer with 5+ years experience in full-stack financial application development. Highly skilled in JavaScript, C# and SQL.

Work Experience

2022 - 2024

Totalsoft

Software Developer

- Improved open sourced packages, supported by the company.
- Supported complex enterprise full-stack applications through multiple release cycles.
- Contributed to the development and delivery of the latest release of the leasing application, while supporting ongoing operations for enterprise clients such as BMW, Scania, and BCR Leasing.
- Developed documentation and installation steps for easier onboarding.

2024 - 2025

Bitnovel Solutions

Software Developer

- Developed and enhanced custom software for BRD Bank's home insurance department, including debugging and monitoring the testing environment within the Azure ecosystem.
- Utilized JavaScript with the proprietary FintechOS framework to rapidly develop and modify web applications.
- Designed and optimized SQL scripts and procedures to retrieve accurate data for the software solution.

2025 - present

Deloitte

Senior Consultant

- Developed the electronic signature, OCR and reporting systems for CEC bank's personal loan, credit card and overdraft package flows.
- Supported production by solving problems that appeared with the systems above and the rest of the application.
- Developed an internal testing application that aided development and allowed for automatic testing.
- Developed high level documentation for client and stakeholders.
